WITH the Buldwin County po-

WITH the Baldwin County potato crop 75 per cent harvested, the OFA has ordered ceiling prices into effect as of Monday, May 22. This word comes
from Congressian George Grant.
The ceiling will be \$3.25 a hundred. From June 1 through June
15, \$3.08 and from then on it will
be \$2.90. Says Mr. Grant:
"As you probably know price
trends in the past have steadied
at about this comparative point
in the movement of the crop and
on that basis it appears that the
OPA order will cause further
losses to the growers who will
still have potatoes to ship on and
after May 2. (There will be little
of these.).

I regret very much the action taken by the OPA in effectuating price controls but there is some astisfaction in the fact that the prices authorized are a little little than those first planned by the OPA in the price authorized are altitle little than those first planned by the OPA in the fact that the prices authorized are a wigordusly protesting the order and will continue my efforts to help find some basis on which the government may be able to grain some form of relief to the growers in Alabama who have gone the rounds with him at the growers in Alabama who have suffered from this sesson's crop failure."

I asked one woman at the sale to grain some form of relief to the growers in Alabama who have done the saire thing.

Montgomery had the honor of entertraining during the weekend the Alahama Federstion of Business and Professional Women's Clubs. I learned from Mrs. Carrier K. Andrews some of the history of this time and useful organization. The National Federation was formed in Missouri in 1919. It is non-sectarism and non-partism. The Alabama Federation was organized and federation was organized with Mrs. The main purpose of the organization is to elevate the standards of women in business and professions; to promote the interests of the women; to bring about a spirit of cooperation among business and professional women in the United States; to extend opportunities to business and professional women through education along industrial, scientific innes.
